The BRICK™: 9610 LED - Explosion Proof Area Light.

Various stands & mounting options specially built and available for use with The BRICK™: 9610 LED - Explosion Proof Area Light.

A-FRAME MOUNT

Our A-Frame Mount is designed and built to provide a smaller, lower profile & wider base for extra stability. Easily adjust & reposition the beam angle giving the user better productivity.

- Machined out of solid blocks of aluminum providing superior durability.
- Comes with black polyurethane bumpers for area protection & stability.
- Built to use with either mechanical or magnetic mounting plates.

HAND CART MOUNT

This free-standing mount comes with wheels, handles and a place to hold those heavy cords. You can wheel those BRICKs right into position.

- Built with non-sparking aluminum and stainless steel components throughout.
- Add the “Yoke” Mount to provide 2 mounting locations for more than one BRICK™.
- We recommend our multi-position knuckles for multi-directional lighting.
At Western Technology we understand the demanding and even brutal environments where you work. Our Quad Pod stand is designed and built to take the abuse so you can focus on your work.

- Built with non-sparking aluminum and stainless steel components throughout
- Lightweight and compact; stand folds to 64” inches and extends to 96”

**HAND RAIL/LADDER MOUNT**

Use the Ladder Mount to easily hang your BRICK to any ladder or hand rail.

- Built with non-sparking aluminum and stainless steel components throughout
- Rubber strip backing for better grip.
- 2 mounting locations
- 3 shackles for safety strap, providing added protection.

**TRIPOD STAND (BASE & RISER)**

Tripod stand includes the base & riser. Use separate or magnetically connect them together.

- Built with non-sparking aluminum and stainless steel components throughout
- Magnetic connectors allow for easy mounting.
- Polyurethane bumpers and foot pads for extra protection and stability.

**QUAD POD STAND**
